

# Safety Symbols Foldable for Interactive Notebooks

By Caitlin Miller

# Safety Symbols Outside

Animal Safety

Chemical Safety

Cut on solid lines.

Fold on dashed lines.

Fire Safety

Sharp  
Instrument  
Safety

This section will be glued  
down so you cannot see the  
directions anymore 😊

Electrical Safety

Heat Safety

Eye and Face  
Safety

Glassware Safety

# Safety Symbols Inside

## Chemical Safety

-  Protect your eyes/skin/clothes
-  Waft fumes towards your nose
-  Mix only when and what you are directed to
-  Let teacher know of spills immediately

## Animal Safety

-  Respect animals
-  Wash before and after handling animals
-  Follow instructions when handling live animals

## Fire Safety

-  Always wear safety goggles
-  Do not reach across an open flame
-  Heat only what directed to
-  Have fire safety tools handy

## Sharp Instrument Safety

-  Sharp items can damage your skin
-  Use extreme caution
-  Cut away from yourself and others

## Electrical Safety

-  Never touch electrical objects with wet hands
-  Use sockets away from water
-  Do not overload sockets
-  Pull a cord by the plug, not the wire

## Heat Safety

-  Hot items are being used
-  Use heat resistant gloves
-  Move with caution

## Eye and Face Safety

-  Wear protective eye wear (goggles)
-  Do not remove goggles until lab is cleaned up

## Glassware Safety

-  Items can potentially break
-  Hold with both hands
-  Do not clean up broken glass.
-  Notify the teacher immediately

Thank you for downloading my Safety Symbols foldable. This will help students learn 8 common safety symbols and their meanings for science labs. This is a simple foldable with 2 versions, outlined and filled. To help your students review their knowledge of science safety, try my [Science Safety Task Cards](#). I hope you find this freebie useful and helpful. For more resources and ideas, visit my TpT store.
